

Questão 22

Education for Sustainable Development

Projects from Botswana, Brazil and Germany win UNESCO-Japan prize on Education for Sustainable Development.

With a world population of 7 billion people and limited natural resources, we, as individuals and societies, need to learn to live together sustainably. We need to take action responsibly based on the understanding that what we do today can have implications on the lives of people and the planet in future. Education for Sustainable Development empowers people to change the way they think and work towards a sustainable future.

UNESCO aims to improve access to quality education on sustainable development at all levels and in all social contexts, to transform society by reorienting education and help people develop knowledge, skills, values and behaviours needed for sustainable development. It is about including sustainable development issues, such as climate change and biodiversity into teaching and learning. Individuals are encouraged to be responsible actors who resolve challenges, respect cultural diversity and contribute to creating a more sustainable world.

(<https://en.unesco.org>. Adaptado.)

According to the second paragraph, one of sustainable development initiatives to be tackled by education should be to

- (A) develop skills necessary for work.
- (B) add climate change themes into school dynamics.
- (C) help people acquire basic and general knowledge.
- (D) enforce quality education in some specific contexts.
- (E) stimulate creativity, art and acting.

ALTERNATIVA B

Lê-se a resposta no seguinte trecho do segundo parágrafo: *“It is about including sustainable development issues, such as climate change and biodiversity into teaching and learning.”*
