

Questão 23

Education for Sustainable Development

Projects from Botswana, Brazil and Germany win UNESCO-Japan prize on Education for Sustainable Development.

With a world population of 7 billion people and limited natural resources, we, as individuals and societies, need to learn to live together sustainably. We need to take action responsibly based on the understanding that what we do today can have implications on the lives of people and the planet in future. Education for Sustainable Development empowers people to change the way they think and work towards a sustainable future.

UNESCO aims to improve access to quality education on sustainable development at all levels and in all social contexts, to transform society by reorienting education and help people develop knowledge, skills, values and behaviours needed for sustainable development. It is about including sustainable development issues, such as climate change and biodiversity into teaching and learning. Individuals are encouraged to be responsible actors who resolve challenges, respect cultural diversity and contribute to creating a more sustainable world.

O cartum dialoga com o seguinte trecho do texto “Education for Sustainable Development”:

- (A) “UNESCO aims to improve access to quality education on sustainable development”.
- (B) “Education for Sustainable Development empowers people to change the way they think”.
- (C) “Individuals are encouraged to be responsible actors who resolve challenges”.
- (D) “what we do today can have implications on the lives of people and the planet in future”.
- (E) “a world population of 7 billion people”.

ALTERNATIVA D

O pai diz ao filho “ Pelo menos fizemos muito dinheiro antes de destruir o meio ambiente” . Tal afirmação ilustra que nossas ações podem ter consequências no futuro.
